Java

```java
class Solution {
    public int passThePillow(int n, int time) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number} n
 * @param {number} time
 * @return {number}
 */
var passThePillow = function(n, time) {

};
```

TypeScript

```typescript
function passThePillow(n: number, time: number): number {

};
```

C++

```cpp
class Solution {
```

```cpp
public:
    int passThePillow(int n, int time) {

    }
};
```

C#

```csharp
public class Solution {
    public int PassThePillow(int n, int time) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun passThePillow(n: Int, time: Int): Int {

    }
}
```

Go

```go
func passThePillow(n int, time int) int {

}
```
